## 2-Stage Countertop Water Filter

### General Description:

**AQUAFILTER** offers **FHCTF** - kitchen filter for countertop point-of-use installation. **FHCTF** provides a continuous supply of clean, fresh drinking water. System include **FCCA-STO** filter cartridge, which removes sediments such as sand, silt, rust, suspended solids as well as free chlorine, certain pesticides and organic compounds. **Utilizing NSF approved coconut shell activated carbon greatly improves taste and odour of filtered water.** **FHCTF** is one of the simplest and most economic solutions designed to improve the quality of potable water. This filter is easy to install and use. It can be placed on a kitchen countertop and connected directly to kitchen faucet.

In case of non-standardized kitchen faucet thread, transition adapters **FXFVP** and **FXFTP** are available.

Depending on water quality, system can be configured by selecting appropriate filter cartridges (STO-series) to meet customers demands.

### Features:

- High quality
- Competitive pricing
- Fast product delivery
- A wide range of interchangeable water filter cartridge types
- Made in EU
- Compact, undercounter, and apartment size
- Manufactured from FDA CFR-21 compliant materials
- Two Stages of Filtration
- Easy to install with System Specifications
- Filter equipt with faucet and all installation accessories
- Improved taste and odour of water
- Designed for enhanced dirt-holding capacity
- Great-tasting water for drinking and cooking
- Remove chlorine
- Remove organic compounds
- User friendly

### Recomendations for Use:

- Point-of-Use (POU) systems can filter out bad tastes, colors or odors, which pose no health risk but still affect the water quality
- This system will improve the flavor of water used for drinking and cooking
- Perfect for almost any household
- Recommended for Families

**Additional accessories**

**NOTE**

- Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system.
- Water filtration systems can help reduce the presence of contaminants. In addition, some water filtration systems can help reduce the presence of microorganisms or other contaminants with potential health effects.
- We strongly recommend regularly scheduled maintenance and replacement of the filter cartridge in order for the product to perform properly.
- Replace the filter cartridge at least every 3 or 6 months (depending on water quality).

**LIMITED WARRANTY:** AQUAFILTER warrants that this product is free from defects in materials and workmanship. This warranty, together with any and all warranties implied by law, shall be limited to a period of two (2) years from the date of original purchase. This limited warranty does not apply to failures that result from abuse, misuse, alteration or failure to properly comply with installation or cartridge change instructions.
